

**ATK TS007 3 STAR & DIAMOND RATED EURO CYLINDER - DIMENSIONS**

Tested to BS EN1303:2005/TS007:2014/BS3621/GVA.

BS EN 1303:2005 Classification

TS007:2014

The ATK euro profile cylinder has been designed to provide maximum resistance against known methods of attack.

TS007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3 star rating system, and can be achieved by combining a 1 star cylinder with a 2 star security door furniture solution.

The Avocet ATK lock has a maximum 3 star rating and will retro-fit without the need for additional security hardware.

- Snap Secure
- Anti-drill
- Anti-bump
- Anti-pick
- Anti-screw
- Cam capture technology
- Retro-fit
- Master key capability

**ATK features the unique patented locking cam that effectively combats against lock snapping.**

The security features of the ATK thumbturn mean that unlike most locks with a floating cam it cannot be bypassed with a wire or easily opened after a snapping attack.

To operate - push to engage the thumbturn, and turn 360°. The thumbturn must pop back out to the "Click Secure" position before closing the door.
